## Why Environment and Compliance Matter

---

Environmental protection and compliance are essential components for businesses and individuals alike. Environmental protection ensures the preservation of human health, biodiversity, and climate stability, while compliance ensures adherence to laws, regulations, and standards set by authorities. By safeguarding natural resources and promoting sustainable practices, compliance not only mitigates risks and legal liabilities but also demonstrates ethical responsibility towards stakeholders. It fosters operational efficiency, enhances reputation, and contributes to a sustainable future by minimizing environmental impact and ensuring public health and safety. Together, environmental protection and compliance form the foundation for responsible and sustainable business practices, benefiting both current and future generations.

## Why Choose Us?

---

- ✔ **Expertise:** Our team of professionals has extensive experience in environmental consulting and compliance.
- ✔ **Comprehensive Services:** We offer a full spectrum of services to meet all your environmental needs.
- ✔ **Regulatory Compliance:** We ensure that your operations comply with all relevant environmental regulations.
- ✔ **Sustainable Solutions:** We promote sustainable practices to help protect the environment.

## Introduction

Global Enviro Consulting Pvt. Ltd. is a team of experts with over 08 years of experience helping businesses follow rules and become more sustainable. We offer a wide range of services, from preparing environmental reports to obtaining the necessary licenses.

We believe in honesty, delivering excellent work, and protecting the environment. Using advanced technology, we monitor environmental conditions to ensure compliance with regulations. Collaborating closely with government agencies, certified labs, and industry experts allows us to achieve superior results.

Our focus is on understanding and meeting our clients' specific needs while building trust through transparent interactions. We continuously strive to learn and improve, staying updated with the latest regulations.

Choosing Global Enviro Consulting Pvt. Ltd. means businesses can confidently navigate regulatory requirements, reduce their environmental footprint, and contribute to a sustainable future.

## Our Mission

At Global Enviro Consulting Pvt. Ltd., we provide holistic, sustainable environmental solutions to help businesses comply with regulations and promote stewardship. Our dedication includes guiding clients to meet ecological standards, implementing practices to protect the environment, delivering bespoke, high-quality services, innovating to address new challenges, and keeping clients informed about regulatory changes and best practices.

## Our Vision

At Global Enviro Consulting Pvt. Ltd., we strive to lead in environmental consulting, driving positive change for a sustainable future. Our goals are to set the standard with innovative solutions, promote sustainable development, empower clients with essential knowledge and tools, adopt cutting-edge technologies to address new challenges, and inspire industry-wide collaboration for environmental conservation.

## Our Services

---

At Global Enviro Consulting Pvt. Ltd., we offer comprehensive testing services to ensure businesses comply with environmental regulations and foster sustainable practices. Our commitment encompasses guiding clients in achieving ecological standards, implementing protective measures for the environment, providing tailored, high-quality services, innovating to tackle emerging challenges, and keeping clients updated on regulatory changes and best practices.

### Water Quality Monitoring:

Water quality monitoring is critical to ensure safe and clean water for all purposes. It involves several sub-categories:

1. **Drinking Water:** Monitoring drinking water ensures it is safe for human consumption. Parameters such as pH, turbidity, and microbial contamination are checked regularly.
2. **Groundwater:** Groundwater monitoring assesses the quality of water found beneath the earth's surface, crucial for preventing contamination from industrial activities and ensuring safe drinking water sources.
3. **Surface Water:** Surface water monitoring involves the evaluation of rivers, lakes, and streams to detect pollutants and maintain aquatic health.
4. **Borewell Water:** This type of monitoring ensures that water drawn from borewells meets safety standards, particularly in areas relying on borewell water for drinking and irrigation.
5. **Swimming Pool Water:** Swimming pool water must be monitored for chlorine levels, pH, and microbial content to ensure it is safe for swimmers.
6. **Boiler Water:** Monitoring boiler water is essential to prevent scale formation and corrosion in industrial boilers, ensuring efficient and safe operations.
7. **Wastewater:** Both domestic and trade effluents are monitored to ensure that wastewater discharged into the environment meets regulatory standards, preventing pollution.
8. **Air Quality Monitoring:** Air quality monitoring helps in assessing the pollution levels in the air, which is critical for public health.
9. **Ambient Air Quality:** This involves measuring pollutants like particulate matter, sulfur dioxide, and nitrogen oxides in the outdoor air.

10. **Indoor Air Quality:** Monitoring indoor air quality is vital for maintaining healthy living and working environments, focusing on pollutants such as volatile organic compounds (VOCs) and carbon monoxide.
11. **Meteorological Monitoring:** Meteorological monitoring supports air quality assessments by providing data on weather conditions that influence pollutant dispersion.
12. **Soil and Solid Waste Monitoring:** Monitoring soil and solid waste helps in understanding and managing land pollution.
13. **Soil Characterization and Fertility:** This involves analyzing soil properties to determine its fertility and the presence of contaminants, aiding in effective land use management.
14. **Solid Waste Characterization:** Characterizing solid waste helps in identifying the types and quantities of waste produced, facilitating proper waste management and recycling efforts.
15. **Noise Monitoring:** Noise pollution is a significant environmental issue, and its monitoring is essential for maintaining healthy living conditions.
16. **Ambient Noise:** Monitoring ambient noise levels helps in understanding the general noise pollution in an area, which can affect the quality of life.
17. **Work Zone Noise:** Assessing noise levels in work zones ensures that they are within safe limits to protect workers' health.
18. **Stack Source and Process Vents:** Monitoring emissions from stacks and process vents ensures that industrial activities comply with air quality standards, reducing pollution.

"Monitoring our environment is essential to safeguarding the health and future of our planet."

# Environmental & Industrial Consultancy Services

Our consultancy services are designed to help you navigate the complexities of environmental regulations and obtain the necessary approvals and certifications:

- 1. NOC (No Objection Certificate) OR CTE (Consent to Establishment) from State Pollution Control Boards:** We provide expert guidance for industries seeking Consent to Establish (CTE) from the pollution control board. Our dedicated team assists you in ensuring compliance with environmental regulations from the outset. We manage the entire process, from site assessment and document preparation to communication with regulatory authorities. Our comprehensive services are designed to facilitate a smooth and efficient approval process, helping you establish your operations while adhering to all necessary environmental standards.
    - CTE Expansion: Permission to expand an existing project, ensuring the expansion complies with environmental rules.
    - CTE Extension: Renewal of the Consent to Establish certificate when it's nearing expiration, confirming continued compliance with regulations.
- “Under the Water (Prevention and Control of Pollution) Act, 1974, and the Air (Prevention and Control of Pollution) Act, 1981, industries and projects that have the potential to cause water and air pollution must obtain a "Consent to Establish" from the relevant State Pollution Control Board (SPCB) or Pollution Control Committee (PCC) before commencing construction or operations.”

**"Monitoring our environment is essential to safeguarding the health and future of our planet."**

- 2. CTO (Consent to Operate) from State Pollution Control Boards:** We specialize in providing comprehensive solutions for industries seeking Consent to Operate (CTO) certificates from the pollution control board. From initial assessment and documentation preparation to liaising with regulatory authorities, we streamline the entire application process. We ensure a smooth and efficient process, tailored to meet each client's needs.

“Consent to Operate (CTO) is a certificate issued by the State Pollution Control Board (SPCB) that allows businesses to operate after the Consent to Establish (CTE) is approved. It's a regulatory requirement that ensures businesses operate within environmental safety and sustainability standards. CTO compliance covers aspects like waste management, emission controls, water conservation, and hazardous material handling.”

- 3. Authorization under HWM Rules, 2016 from State Pollution Control Boards:** we provide expert assistance to industries seeking Authorization under the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (HWM Rules). Our experienced team ensures that your business complies with all necessary regulations for the management, handling, and disposal of hazardous wastes. We guide you through the entire authorization process, from evaluating your current practices and preparing required documentation to liaising with regulatory authorities.

“Hazardous Waste Management Authorization is required for facilities that generate, store, transport, treat, or dispose of hazardous waste. This authorization ensures that hazardous waste is managed in an environmentally sound manner, in compliance with the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016.”

- 4. Authorization under BMW Rules, 2016 from State Pollution Control Boards:** We offer specialized services to assist healthcare facilities and related industries in obtaining Authorization under the Bio-Medical Waste Management Rules, 2016. Our team of experts ensures that your organization complies with all regulations regarding the safe handling, segregation, and disposal of bio-medical waste. We provide end-to-end support throughout the authorization process, including compliance assessments, documentation preparation, and interactions with regulatory authorities.

5. **Factory Act Registration under the Factories Act 1948:** Our team offers essential support to businesses navigating the process of obtaining factory licenses, ensuring compliance with the Factories Act, 1948. We provide comprehensive assistance, including meticulous documentation preparation and effective liaison with regulatory authorities. Our services encompass adherence to key provisions such as ensuring safe working conditions, compliance with health and safety standards, provisions for welfare amenities, and adherence to regulations concerning working hours and employment of young persons and women.

*"The Factories Act, 1948 is an important Indian law regulating working conditions in factories. It applies to premises with 10 or more workers using power, or 20 or more without power. The Act covers factory management, working hours, health and safety, employment of young persons and women, leave, and welfare facilities like sanitation and first aid. Compliance is mandatory to ensure a safe and healthy work environment."*

6. **Approval of Factory Building Plans under the Factories Act, 1948 :** Under the Factories Act, 1948, the approval of factory building plans is crucial for ensuring compliance and safety standards in industrial operations. Our consultancy firm specializes in assisting businesses with the approval process of factory building plans. Our services ensure all building plans meet statutory safety measures, including structural stability, adequate ventilation, lighting, and sanitation facilities.

7. **Aravali Clearance from Deputy Commissioner Office in District-Gurgaon & Nuh :** Our team specializes in providing comprehensive support for filing applications to the Deputy Commissioner's office and securing approvals from the relevant authorities. We are dedicated to ensuring that your applications are handled professionally and efficiently, minimizing delays, and ensuring compliance with all legal and regulatory frameworks.

*"Any project proponent obtaining Change of Land Use (CLU) permission from DTCP in districts Gurgaon and Nuh, and seeking Consent to Establish (CTE) certificate from Haryana State Pollution Control Board, must obtain an Aravali Clearance letter from the Deputy Commissioner's office"*.

8. **Forest Clearance from the Forest Department:** Our team specializes in preparing and collecting the requisite documents from clients and filing comprehensive applications to secure forest clearance. We ensure that every aspect of the application meets regulatory standards, facilitating a smooth and efficient approval process from the relevant authorities.

“Any industry that obtains Change of Land Use (CLU) and applies for Consent to Establish (CTE) from the Haryana State Pollution Control Board must also obtain a forest clearance letter from the concerned authority”

9. **Fire NOC & Fire Fighting Scheme Approval:** Our specialized team visits the site to gather information from the client and prepares a detailed report on the installation of firefighting equipment based on the approved building plans. We ensure that the proposed firefighting scheme meets all relevant regulations. We then submit the report and work to get it approved by the competent authority.

10. **Trader License for Scrap Dealers:** Our team provides comprehensive support to units acting as traders who import waste on behalf of actual users. We assist in preparing and submitting all necessary documents for obtaining one-time authorization. Our goal is to ensure that the application process is handled efficiently and that all regulatory requirements are met. We work diligently to facilitate approval from the relevant department.

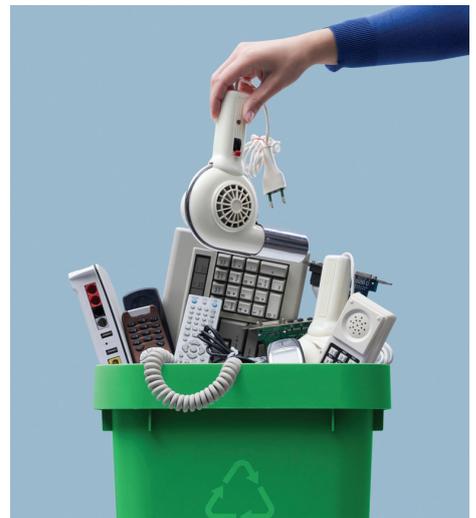

“In case a unit, acting as a trader and importing waste on behalf of actual users, applies for one-time authorization under Rule 13 for the import of other waste listed in Part D of Schedule III of the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016”.

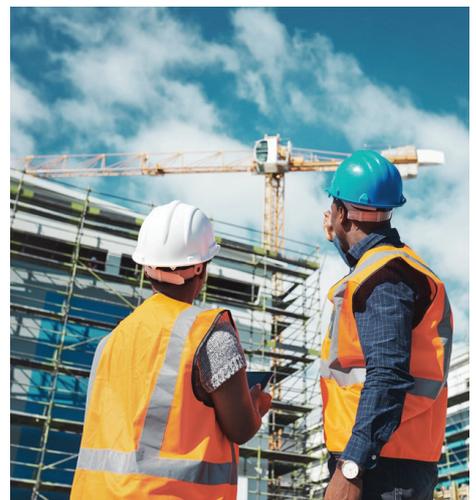

**11. Registration under Plastic Waste (Management) Rules, 2016:** The grant of registration as producers, manufacturers, brand owners, recyclers, and processors under the Plastic Waste Management Rules, 2016 is essential for entities involved in the manufacturing and management of plastic products. Our consultancy firm specializes in guiding businesses through this registration process, ensuring compliance with all regulatory requirements. We assist in preparing and submitting the necessary documentation, conducting site inspections if required, and liaising with regulatory authorities to facilitate a smooth and timely approval.

**12. Authorization under e-Waste (Management) Rules, 2016:** Authorization for manufacturers, recyclers, dismantlers, and refurbishers of e-waste specified in Schedule 1 of the E-Waste (Management) Rules, 2016 is crucial for entities involved in handling electronic waste. Our consultancy firm specializes in guiding businesses through the authorization process under these rules. We assist in preparing and submitting the required documentation, conducting necessary assessments, and ensuring compliance with all regulatory standards. By facilitating this authorization, we help businesses establish their operations responsibly, promoting sustainable e-waste management practices and environmental stewardship.

**13. Environment Audit:** An environmental audit is a thorough evaluation of how well a business is managing its environmental impact and complying with regulations. It involves examining everything from waste management practices to energy use and emissions. Our consultancy firm specializes in conducting these audits, where we assess current practices, review documentation, and visit sites to gather information. By identifying areas where improvements can be made, we help businesses minimize their environmental footprint and ensure they are meeting legal requirements. Our goal is to support businesses in becoming more sustainable and responsible in their operations.

**"In on drop of water are found all the secrets of all the oceans."**

#### 14. **Re-sampling / Suspension or Revocation of Closure Orders:**

Re-sampling, suspension, or revocation of closure orders is about ensuring that any issues leading to a closure are fixed before allowing businesses to reopen. Our consultancy oversees this process, working closely with regulatory authorities to conduct necessary checks and re-sampling. We help ensure businesses meet all regulatory requirements before closure orders are lifted, promoting responsible operations and compliance with environmental standards.

#### 15. **Change of name in the record of HSPCB or Transfer of Consent:**

##### **A. Changing the name in the records of the Haryana State Pollution Control Board (HSPCB)**

requires submitting updated documentation that reflects the new name of the entity or organization. Our consultancy specializes in assisting businesses through this process, ensuring all paperwork is accurately completed and submitted to the HSPCB. We facilitate communication with the board to streamline the name change process and ensure compliance with all regulatory requirements. Whether due to rebranding or legal changes, we help businesses navigate the administrative procedures involved in updating their records with the HSPCB efficiently.

##### **B. Transferring consent**

in the Haryana State Pollution Control Board (HSPCB) involves the process of transferring the environmental consent granted to operate a business or industrial unit from one entity to another. Our consultancy specializes in guiding businesses through this procedure, ensuring all necessary documentation and formalities are completed accurately and submitted to the HSPCB. We facilitate communication and coordination with the board to ensure a smooth transfer process, complying with all regulatory requirements and helping businesses manage their environmental responsibilities effectively.

**"The beauty of water is that it has life; it sustains us and is our most precious resource."**

**16. Release of Performance Security from HSPCB:** Performance security is an amount deposited by industries when obtaining Consent to Establish (CTE), ensuring compliance with environmental laws.

Releasing performance security from the Haryana State Pollution Control Board (HSPCB) involves getting back the deposit or bond businesses submitted to ensure they comply with environmental rules. Our consultancy helps businesses through this process by handling all the necessary paperwork and ensuring everything is submitted correctly to the HSPCB. We work closely with the board to make sure the release of performance security is smooth and helps businesses manage their financial and environmental responsibilities effectively.

**17. ETP/STP Installation:** Installing an Effluent Treatment Plant (ETP/STP) is crucial for managing and treating industrial/domestic wastewater to meet environmental standards. Our consultancy offers complete support for ETP/STP installation, including:

- **Assessment and Design:** We assess your site and design an ETP/STP tailored to your specific needs, ensuring compliance with local regulations.
- **Documentation and Permits:** We assist in preparing and submitting all necessary documentation to obtain permits and approvals from regulatory authorities.
- **Vendor Coordination:** We coordinate with vendors to procure high-quality equipment

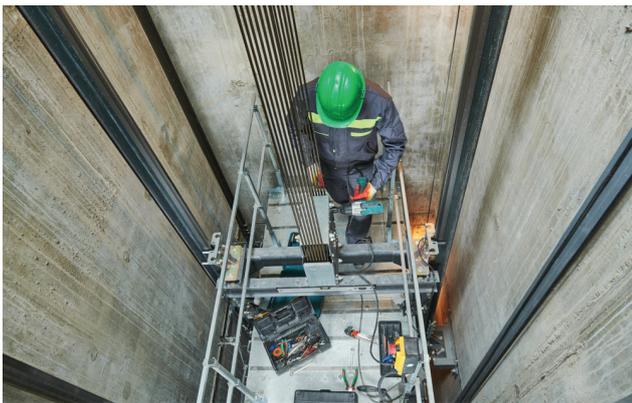

and materials for the ETP/STP installation.

- **Installation and Commissioning:** Our experts oversee the installation process to ensure it is executed correctly and efficiently. We also handle the commissioning of the plant, ensuring it operates as intended.
- **Training and Maintenance:** We provide training for your staff on operating and maintaining the ETP/STP. Additionally, we offer ongoing maintenance support to ensure the plant continues to function optimally.

By partnering with us, you can ensure your ETP/STP installation is compliant, efficient, and effective in treating industrial wastewater.

**18. Issuance of Capacity Assessment Letter from DIC (District Industries Centre):** We provide comprehensive support for industrial units seeking to obtain a capacity assessment letter from the District Industries Centre (DIC). This letter is crucial for validating the operational capacity of units, especially for obtaining registrations related to Plastic Waste and e-waste from the Haryana State Pollution Control Board (HSPCB). Our consultancy specializes in guiding businesses through this process, assisting with documentation preparation, and facilitating communication with DIC officials. We ensure that all requirements are met effectively, helping industrial units navigate regulatory procedures and comply with environmental standards for waste management.

**19. Lift License, DG Sets NOC & Transformers NOC:** We specialize in assisting businesses in obtaining licenses and No Objection Certificates (NOCs) for various installations such as lift installations, diesel generator (DG) sets, and transformers. These certificates are essential to ensure safety and compliance with regulatory standards. Our consultancy guides businesses through the entire process, from preparing and submitting necessary documentation to coordinating with regulatory authorities. We ensure that all requirements are fulfilled efficiently, helping businesses maintain operational safety and regulatory compliance effectively.

**20. Shops and Commercial Establishments License:** A Shops and Commercial Establishments License is needed for businesses to operate legally and comply with labour laws. Our consultancy helps you prepare and submit the necessary documents, ensure compliance with regulations, and handle the application process. We also track the status of your application and assist with renewals to keep your business compliant with local laws.

# Statutory Compliances

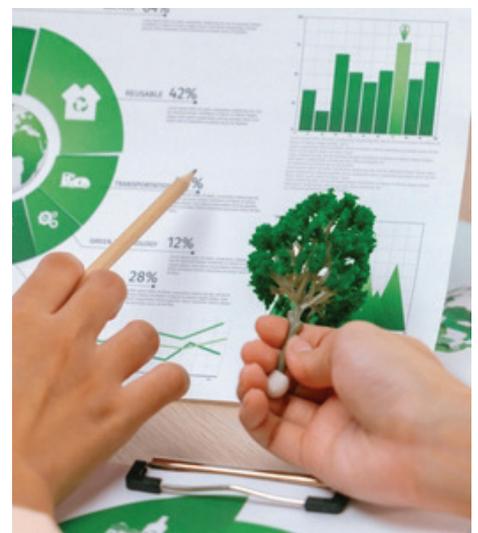

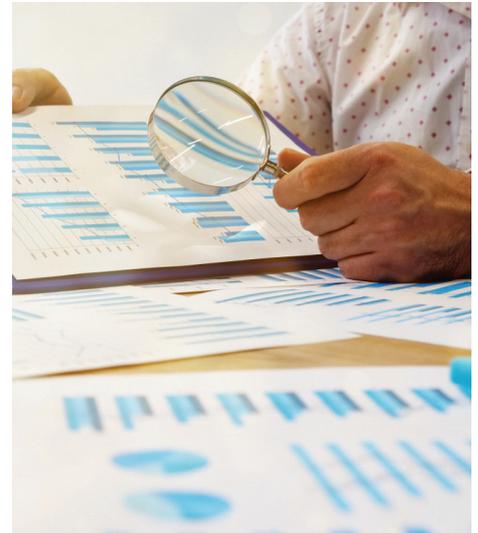

1. **Six-Monthly Compliance Reports:** Our consultancy firm provides expert assistance in preparing six-monthly compliance reports required by project proponents as per the conditions of their Environmental Clearance. We meticulously gather and analyze all relevant data, ensuring that the reports accurately reflect the project's adherence to environmental regulations and mitigation measures. Our services include comprehensive documentation preparation, data compilation, and analysis, ensuring compliance with all regulatory requirements.

(As per EIA Notification 2006, each and every project proponent who has been granted EC is mandated to provide six monthly compliance reports whether in the construction phase or operational phase (Source: Ministry of Environment, Forest and Climate Change, GOI)

2. **Annual Return in Form IV under HWM Rules, 2016:** We specialize in assisting businesses with preparing and submitting their annual returns. Our service ensures that all necessary documents are accurate and comply with regulatory standards. We handle the entire submission process and ensure everything is done correctly and on time, making compliance straightforward for our clients.

“Form IV is a standardized format used by industries to submit their annual returns concerning the management of hazardous and other wastes. This form is part of the compliance requirements under the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016”.

3. **Environment Statement in Form-V:** An Environment Statement in Form-V is a document required under environmental regulations. It summarizes the environmental performance and compliance of an industrial or manufacturing facility over a specified period. Our consultancy firm assists businesses in preparing and submitting this statement, ensuring it accurately reflects their environmental activities, emissions, and compliance with regulatory standards.

4. **Annual Return in Form III under e-Waste Rules, 2016:**

An Annual Return in Form III under the e-Waste Rules, 2016 is a mandatory document that businesses handling electronic waste must submit annually. This return summarizes the activities related to e-waste management, including collection, recycling, and disposal, as well as compliance with the rules and regulations specified under the e-Waste Rules, 2016. Our consultancy firm specializes in assisting businesses with the preparation and submission of this annual return. We ensure all required information is accurately documented and submitted on time, facilitating compliance with regulatory requirements effectively.

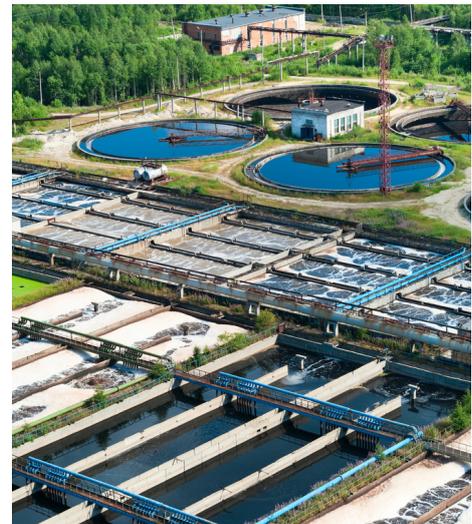

5. **Monitoring Testing from NABL-approved Labs:**

Monitoring testing involves conducting regular assessments and analyses to evaluate environmental or operational parameters. This process helps businesses ensure compliance with regulatory standards and assess the effectiveness of their environmental management practices. Our consultancy firm provides expertise in coordinating and conducting monitoring testing.

6. **Submission of Logbook of ETP/STP/ APCM:**

We specialize in assisting businesses with preparing and submitting logbooks for the operation of Effluent Treatment Plants (ETP), Sewage Treatment Plants (STP), and Air Pollution Control Measures (APCM) over the last three months. These logbooks include detailed records of energy and chemical consumption, as well as readings from magnetic flow meters for ETP/STP inlets and outlets. Our consultancy ensures all entries are accurate and comply with regulatory standards set by bodies like the Haryana State Pollution Control Board (HSPCB). We handle the entire documentation process, facilitating compliance and helping businesses maintain effective environmental management practices.

7. **Regulatory Updates:**

We provide comprehensive and up-to-date information on the latest developments in pollution control board norms. Our consultancy stays current with all regulatory changes and updates, ensuring that businesses are always informed about new requirements and guidelines. We help businesses understand and implement these changes, ensuring compliance with the latest standards set by regulatory authorities. By partnering with us, businesses can stay ahead of regulatory changes and maintain compliance effectively.

## 8. Waste Disposal Agreements:

### • Agreement with Authorized Recycler for Used Oil:

We assist businesses in making agreements with authorized recyclers approved by the State Pollution Control Board (SPCB) for the disposal of waste and used oil. Our services include identifying suitable recyclers, preparing necessary documentation, and ensuring compliance with all regulatory requirements. By facilitating these agreements, we help businesses manage waste disposal responsibly and in accordance with environmental laws.

• **Agreement with GEPIL, Faridabad:** We assist businesses in making agreements with Green Gene Enviro Protection & Infrastructure Pvt. Ltd. (GEPIL) for the disposal of hazardous waste. Our services include facilitating communication

with GEPIL, preparing and reviewing necessary documentation, and ensuring compliance with all regulatory requirements. By partnering with us, businesses can manage hazardous waste disposal responsibly and efficiently.

• **Agreement for e-waste:** We assist businesses in making agreements with authorized recyclers and dismantlers approved by the State Pollution Control Board (SPCB) for the disposal of e-waste, including items like mobiles, computers, laptops, and air conditioners. Our services include identifying suitable recyclers, preparing necessary documentation, and ensuring compliance with all regulatory requirements. By facilitating these agreements, we help businesses manage e-waste disposal responsibly and efficiently.
